Sola materials

Sola cutlery is produced with precision using different types of stainless steel: 18|10 and 18|0.

Each material is thoughtfully selected for its unique properties, catering to various needs in the hospitality industry.

18|10 stainless steel (304 material)

In 18|10 stainless steel, the alloy consists of 18% chromium and 10% nickel. This combination not only provides excellent resistance to corrosion, preventing rust and stains, but also enhances durability and imparts a high mirror polished finish, resulting in high-quality cutlery.

18|0 stainless steel (430 material)

In contrast, 18|0 stainless steel contains 18% chromium without the addition of nickel. While still offering good quality and design, this type of steel may not possess the same level of durability and shine as 18|10 stainless steel. Cutlery made from 18|0 stainless steel is often chosen for applications where cost-effectiveness is a priority.

420 Hardened Knife Steel:

For our knives, we are using 420 hardened knife steel.

This type of steel is known for its strength and ability to maintain a sharp edge. It ensures that our knives are not only durable but also reliable for precise cutting.

Both 18|10 and 18|0 stainless steel has their unique qualities, allowing Sola to offer a range of cutlery to suit different preferences and needs.

PVD coated cutlery

PVD coating, or Physical Vapor Deposition coating, is a process where a thin layer of material, is deposited onto the surface of the cutlery in a vacuum environment. This coating enhances the cutlery durability, resistance to wear, and will also provide decorative finishes in either Black, Copper or Gold.

This PVD coated cutlery will enhance the dining experience by adding an extra touch of elegance to your table.

To maintain the longevity and appearance of our PVD-coated cutlery, it is important to clean them promptly after use. Residue from acidic or protein-containing foods poses a risk of damaging the surface.

Washing instructions for Sola cutlery in hotels and restaurants:

To maintain the brilliance and longevity of your Sola cutlery, please follow the washing instructions below. It is recommended to use only pH-neutral detergents:

1. **Pre-rinse:** Before placing the Sola cutlery in the dishwasher, pre-rinse them to remove any leftover food particles.
2. **Use pH-neutral detergents:** Always use pH-neutral detergents in your dishwasher. Avoid harsh or abrasive cleaners like chlorine, as they may damage the finish and luster of the cutlery over time.
3. **Load cutlery properly:** Place the cutlery in the dishwasher basket with care, ensuring that pieces do not overlap. A standing basket is preferable where knife blades are put upside down to avoid scratches.
4. **Select appropriate wash cycle:** Choose a dishwasher cycle suitable for cutlery. If possible, opt for a gentle or light wash cycle to minimize wear and tear on the cutlery.
5. **Avoid prolonged exposure:** Promptly remove the cutlery from the dishwasher once the cycle is complete. Prolonged exposure to the warm and humid environment inside the dishwasher may lead to discoloration or corrosion over time.
6. **Hand drying:** When the cutlery comes out of the dishwasher, hand dry with a soft, clean cloth is recommended. This step helps to prevent water spots and discoloration on the cutlery.

By following these washing instructions and using pH-neutral detergents, you can ensure that your Sola cutlery remains in excellent condition, providing a polished and professional presentation for your hotel or restaurant guests.

PVD coated cutlery washing Instructions

For optimal care:

- Immediately pre-clean your PVD cutlery with clear, warm water after use.
- Hand wash PVD-coated cutlery is recommended.

When using a dishwasher;

- Use PH neutral detergents only. Avoid using acidic or aggressive cleaners.
- Always rinse under 60°C.
- When the dishwasher comes to a stop, promptly remove water stains or residues by polishing with a soft cotton cloth.
- Store the cutlery separately to avoid scratches.
